

To the Community of Poseyville:

The Town Council of Poseyville would like to update the Community of Poseyville on the nitrate solution. The town board has been in a process of finding a solution to our nitrate issue. At this time, we have secured a grant of \$1,000,000.00 from the State Revolving Fund and EPA has granted us \$549,000.00. This process of finding a solution has been an arduous task for the council. This is a procedure that has now come to a finishing point.

The Solution was to add a new processing area to our existing water plant to cleanse the nitrates from our drinking water to a controllable number. The estimated cost to do this is \$3,848,900.00, which means that the town must come up with \$2,299,900.00 to finance this project. We, as the Town Council, have gotten all the finances that are currently available.

What we now need, is the help of the community by sending letters to our representatives and our senators. The hope is that we have a good show of concern from you, the Poseyville Community, for the costs that will be passed on to the community for the new drinking water process. We are hoping with your help, they can find more assistance that has not been made available to us.

For your convenience, we have their information below. Please reach out with your concerns and state your comments in a factual and respectful manner, so, your comments will be heard.
